IMPORTANT NOTICE OF OBSOLESCENCE

To: All Customers

05/10/10

Subject: SPS Series Product Obsolescence

Dear Customer:

KGS Electronics has manufactured the SPS family of static inverters for over thirty-eight (38) years. Now, because of the unavailability of critical component parts, the Company will be forced to discontinue the manufacture of this product line.

For the past ten years, it has been difficult to procure qualified parts for the SPS series inverters. With advancements in transistor technology, the old bipolar type transistors are rarely utilized in current designs. Therefore, electronic component manufacturers have significantly reduced or eliminated the manufacture of these transistors.

KGS utilizes a special high power bipolar transistor in the SPS series static inverters. These transistors are a critical part of the SPS inverter design. Currently, there are no viable replacements or substitutions available. And, KGS will not risk procuring second source components that may not be of acceptable quality or reliability.

Therefore, we are giving all of our customers notice of obsolescence of the SPS series static inverters. Attached is a cross reference list of recommended replacement parts.

Thank you for your understanding and please contact KGS sales or technical support if you have any questions.

SPS-Series Replacement List

Model	Description	Replacement
SPS-750	60Hz 750VA	SS100
SPS-750D	50Hz 750VA	SB100
SPS-1307	60Hz 1000VA	SS100
SPS-1307A	60Hz 1000VA	SS100
SPS-1307D	50 Hz 1000VA	SB100
SPS-1607	60Hz 1200VA	SS120
SPS-1607A	60Hz 1200VA	SS120
SPS-1607D	50Hz 1200VA	SB120
